CLEAN SPREADSHEET WORKFLOW

Invoice operations that stay crisp from draft to payment.

LedgerFlow turns the rough process in your reference into a polished workspace: create the invoice, add the client, set the due date, and send a shareable link or PDF from one place.

Create Invoice | Open Client List

Open invoices	Outstanding
4	$10,700
Collected	**Clients**
$1,850	4

Today's workflow

Use the invoice page to draft a bill, then generate a live payment link or a lightweight PDF export for client delivery.

1 Create Invoice
Draft a line-item ready invoice with amount, due date, and status.

2 Add Client
Pick an existing client or create a new account while building the invoice.

3 Set Due Date
Track which invoices are due soon and which need follow-up.

4 Generate Link / PDF
Send branded links or export a sharable invoice summary instantly.

Workflow guide
Create invoice
Every draft gets an invoice code, issue date, payment link, and export-ready summary.
Add client
New clients are automatically added into the client directory after invoice creation.
Set due date
Overdue and due-soon statuses update automatically based on the date you enter.
Generate link / PDF
Use the action buttons in each row to simulate delivery and export.
