LF LedgerFlow
Create invoices, add clients, set due dates, generate links and PDFs.

Dashboard Invoices Clients Reports

CLEAN SPREADSHEET WORKFLOW

Invoice operations that stay crisp from draft to payment.

LedgerFlow turns the rough process in your reference into a polished workspace: create the invoice, add the client, set the due date, and send a shareable link or PDF from one place.

Today's Workflow

1. Create Invoice
Draft a line-item ready invoice with amount, due date, and status.

2. Add Client
Pick an existing client or create a new account while building the invoice.

3. Set Due Date
Track which invoices are due soon and which need follow-up.

4. Generate Link / PDF
Send branded links or export a sharable invoice summary instantly.

Invoice workspace with clean rows and clear actions.

Dashboard | **Invoices** | Clients | Reports

Invoices

Build invoices, assign clients, set due dates, and send the next action straight from the row.

Create invoice

Add a new invoice using an existing client or create a new one on the fly.

Select client

Northwind Trading Co. ▾

Or add a new client

Northwind Trading Co. ▾

Amount: 2400

Due Date: mm/dd/yyyy

Notes

Generate Invoice Draft

Workflow guide

Create invoice
Every draft gets an invoice code, issue date, payment link, and export-ready summary.

Add client
New clients are automatically added into the client directory after invoice creation.

Set due date
Overdue and due-soon statuses update automatically based on the date you enter.

Generate link / PDF
Use the action buttons in each row to simulate delivery and export.

Search invoice or client
